Architectural Elements go beyond the scope of decorative pendants. Their scale and design make them integral parts of the interior architecture. Clean contemporary lines complement modern decors. Colored glass trims achieve a perfect balance of color and light.

Choose energy efficient compact fluorescent lamp sources or the warm pleasing light of incandescent lamps. The fluorescent pendants can accept input voltages from 120 to 277 volts, making them practical for commercial applications. Lamp height can be easily adjusted from outside the shade. Turning the finial raises or lowers the lamp up to 2 1/8". Pendants employ cased opal glass shades to spread light evenly with minimal glare. Stainless steel guide cables are decorative accents and help to balance the shades. All pendants may be shortened to the optimal length.
